

MT. PISGAH CHRISTIAN SCHOOL SUP EXPANSION: SUP-12-002

Proposed architectural treatment guidelines:

The exterior building material shall consist of a minimum of 75% (per vertical wall plane) of the following: brick, natural or pre-cast stone, or glass.

The principal entries shall be articulated and should express greater architectural detail than other portions of the building.

Buildings will include at least one architectural element such as columns, arcades, covered-entry walkways, facade offsets, windows, balconies, offset walls, clock towers, cupolas and/or courtyards.

Generally speaking, the buildings facades and architectural details shall resemble those already existing on the Mt. Pisgah Christian School campus as shown in the sample existing architectural images.
